## New CryogenX™ - AgION® Blades

Oster® is the first blade manufacturer to incorporate AgION® antimicrobial into the surface of the CryogenX™ blades. AgION® antimicrobial uses silver, a powerful metal ion, as the active ingredient to effectively control the growth of bacteria, mold and mildew...important protection needed when clipping animals next to each other. Refer to our [Professional Products Blade Chart](#) to select the correct blade for any job.

*If AgION® antimicrobial is on it, millions of bacteria aren't!*
